

# Qualification CPP60420

## Advanced Diploma of Building Design

### Qualification description

This qualification reflects the role of experienced drafters and building designers who apply their skills to complex building design projects.

Practice at this level is underpinned by the ability to critically analyse and synthesise information from a range of sources to generate design solutions and manage the design project. Practitioners work without supervision to design, draft and document plans, specifications and documentation for building design projects on all classes of buildings, as defined by the National Construction Code (NCC), including those of Type A construction.

Licensing requirements apply to building design in some states or territories. For further information, check with the relevant regulatory authority.

### Entry requirements
