

**Draft 0.2**

This is a draft update to CPPSIS4032 Conduct field surveying operations:  
<https://training.gov.au/Training/Details/CPPSIS4032>.

Code changed to CPPSSI4032.

Unit combined with CPPSIS4027 Organise surveying field services.

Combining units minimising replication across units.

Changed PCs to active voice.

Changed 'person' to 'candidate' in PE

Range of Conditions added to Knowledge Evidence.

Mapping info added

## Unit of Competency

### CPPSI4032 Conduct field surveying operations

#### Modification history

Release	Comments
1	<del>Replaces superseded equivalent CPPSI4032A Plan and conduct survey expeditions. This version first released with CPP Property Services Training Package Version 3.</del>
	Replaces superseded equivalent CPPSI4032 Conduct field surveying operations

#### Application

This unit specifies the skills and knowledge required to organise and conduct field surveying operations. It involves planning and preparing equipment and supplies to meet task and work health and safety requirements for field surveying operations. The unit includes completing surveying operations in the field and cleaning, checking, maintaining and storing equipment after the field work is completed.

This unit is suitable for entry level technicians who will use a broad range of cognitive, technical and communication skills to select and apply a range of methods, tools, materials and information to complete routine and non-routine activities and provide and transmit solutions to a variety of predictable and sometimes unpredictable problems. Surveying and spatial information skills are applied in a range of industry contexts including town planning, civil construction, mining, engineering, health, agriculture and defence.

All work must be carried out to comply with workplace procedures, in accordance with relevant State/Territory regulations that govern surveying work as well as work health and safety, regulations and legislation that apply to the workplace.

Cadastral surveying must be undertaken under the supervision of a registered surveyor. Users must check with the relevant regulatory state/territory authority before delivery.

No licensing, legislative, regulatory, or certification requirements apply to this unit of competency at the time of publication.

#### Prerequisite Unit

None

#### Unit Sector

Surveying and Spatial Information Services

#### Elements and Performance Criteria

1. Plan field surveying operation.	<ul style="list-style-type: none"><li>1.1 Identify field surveying objectives, principal work activities and site location in consultation with appropriate persons.</li><li>1.2 Analyse plans and other relevant information to determine the location of services and site references.</li><li>1.3 Determine spatial data specifications, required resources, constraints, and work health and safety requirements.</li><li>1.4 Identify hazards and risks and integrate safety control measures into field services plan according to enterprise requirements.</li><li>1.5 Develop a job schedule with allocated tasks and timeframes.</li><li>1.6 Plan logistics according to location, duration and size of field trip, and resupply requirements.</li></ul>
------------------------------------	---

	1.7 Plan contingency procedures in case of unforeseen events according to enterprise requirements. 1.8 Prepare equipment and vehicles and load and secure supplies according to enterprise requirements. 1.9 Prepare and allocate safety equipment, including personal protective equipment (PPE) for field work.
2. Carry out field surveying activities.	2.1 Locate, prepare and maintain surveying field site according to task and enterprise requirements. 2.2 Conduct surveying activities to meet objectives, timeframes, and work health and safety requirements and to minimise environmental impact. 2.3 Determine and record feature positions in two distinct systems, analogue and digital. 2.4 Monitor surveying activities against planned schedules and objectives.
3. Finalise field surveying operation.	3.1 Restore site as near as practicable to original condition, and dispose of waste according to enterprise requirements. 3.2 Clean and store tools and equipment in a secure location according to enterprise requirements. 3.3 Check equipment, report problems and organise any necessary repairs according to enterprise requirements. 3.4 Complete documentation and check against job specifications. 3.5 Report job completion to appropriate persons according to enterprise requirements.

### Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

### Unit Mapping Information

Supersedes and is not equivalent to CPPSIS4027 Organise surveying field services.

Supersedes and is not equivalent to CPPSIS4032 Conduct field surveying operations.

However, it is equivalent to CPPSIS4027 Organise surveying field services AND CPPSIS4032 Conduct field surveying operations.

## Assessment Requirements for CPPSSI4032 Conduct field surveying operations

### Modification history

Release	Comments
1	<del>Replaces superseded equivalent CPPSIS4032A Plan and conduct survey expeditions. This version first released with CPP Property Services Training Package Version 3.</del>
	Replaces superseded equivalent CPPSIS4032 Conduct field surveying operations

### Performance Evidence

To demonstrate competency, a candidate must meet the elements and performance criteria of this unit by:

- planning two field surveying operations, one of which must be in a remote or isolated area
- carrying out field surveying tasks for one of the above planned operations.

### Knowledge Evidence

To be competent in this unit a candidate must demonstrate knowledge of:

- planning and organising techniques and their application to field surveying work
- use of maps, photographs and other available data for planning activities
- types and uses of surveying equipment
- hazard and risk control measures for field operations
- contingency procedures in the event of unforeseen events according to enterprise requirements
- emergency communication procedures including use of distress beacons
- emergency equipment and procedures including when working in remote and isolated areas
- procedures for minimising the impact on the environment from field work activities.

### Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting where these skills and knowledge would be performed.

Candidates must have access to:

- communications equipment appropriate to field site location
- emergency and personal protective equipment (PPE) appropriate to the operation
- relevant equipment and instruments for field survey
- enterprise procedures and documentation relating to work health and safety.
