

**QUALIFICATION CODE**

CPP20220

**QUALIFICATION TITLE**

Certificate II in Surveying and Spatial Information Services

**QUALIFICATION DESCRIPTION**

This qualification applies to those who require skills development to prepare for workforce entry or vocational training pathways. It reflects the role of individuals who work under direct supervision to perform a range of mainly routine tasks in a surveying or spatial information services context.

No licensing, legislative, regulatory or certification requirements apply to this qualification at the time of publication.

**ENTRY REQUIREMENTS**

There are no entry requirements for this qualification.

**PACKAGING RULES**

To achieve this qualification, competency must be demonstrated in 8 units of competency consisting of:

- 4 core units
- 4 elective units.

Electives are to be selected as follows:

- 4 units from the elective units listed below
- up to 2 of the 4 elective units may be selected from any current training package qualification or accredited course, provided they contribute to a valid, industry supported vocational outcome, maintain the integrity of the AQF level of this qualification and do not duplicate the outcome of another unit used to achieve the qualification.

**Core**

<a href="#"><u>CPCCWHS1001</u></a>	Prepare to work safely in the construction industry
CPPSSI2012	Assist in collecting basic spatial data
CPPSSI2013	Store and retrieve basic spatial data
CPPSSI3011	Produce basic maps

**Elective**

<a href="#"><u>AHCNAR307</u></a>	Read and interpret maps
<a href="#"><u>BSBSUS201</u></a>	Participate in environmentally sustainable work practices
<a href="#"><u>BSBCMM201</u></a>	Communicate in the workplace
CPPSSI3015	Collect basic surveying data
CPPSSI3019	Produce basic plans of surveys
CPPSSI3020	Perform simple surveying and spatial computations

CPPSSI2015	Assist with surveying and spatial field activities
<a href="#">ICTICT203</a>	Operate application software packages
<a href="#">ICTICT211</a>	Identify and use basic current industry-specific technologies.

## QUALIFICATION MAPPING INFORMATION

The CPP20120 Certificate II in Surveying and Spatial Information Services supersedes and is equivalent to the CPP20116 Certificate II in Surveying and Spatial Information Services.

## Modification History

### May 2020

Removed *CPPSIS2016 Assist with load transfers* from the electives as the corresponding unit, *CPPSIS3018 Transfer loads* is proposed for deletion. Both units now proposed for deletion.

The following imported electives have been removed from the Certificate II based on advice from PwC's Skills for Australia, the Skills Service Organisation managing the ICT Training Package, that the units are proposed for deletion.

*ICTICT101 Operate a personal computer*

*ICTICT102 Operate word-processing applications*

*ICTICT105 Operate spreadsheet applications*

*ICTICT210 Operate database applications*

### April 2020

At the webinar held 3 April 2020, this qualification was supported for its potential to provide for learner cohorts such as those undertaking vocational education and training as part of secondary school, those with interrupted formal education, or those with language, literacy and numeracy needs. It was also supported by a large enterprise as having the potential to meet the training needs of a cohort of indigenous learners. The previous recommendation to delete the qualification was reversed.

As NCVER data suggests negligible use of this qualification, evidence of industry support (such as letters/emails) for its retention is required to be included in the Case for Endorsement to be considered by the Australian Industry Skills Council.

Artibus suggests that the elective unit [CPPCMN3006](#) *Provide effective client service* is too high a level for the qualification and potential learners and that it be replaced with [BSBCMM201](#) *Communicate in the workplace*

Artibus suggests that the elective unit [RIISTD201D](#) *Read and interpret maps* be replaced by [AHCNAR307](#) *Read and interpret maps* as the context of AHCNAR307 is more appropriate for surveying and spatial learners.

The four CPPSIS units unique to the Certificate II are no longer proposed for deletion.

#### **November 2019**

Qualification proposed for deletion. There is no vocational outcome as it is 'pre-vocational'. Not recognised or needed by industry.

The four units below are proposed for deletion as the task is not required by industry.

CPPSIS2012	Assist in collecting basic spatial data
CPPSIS2013	Store and retrieve basic spatial data
CPPSIS2015	Assist with surveying and spatial field activities
CPPSIS2016	Assist with load transfers.
