Introduction

About Artibus Innovation

The Property Industry Reference Committee (IRC) represents the workforce training and skills development needs of the property services industries.

Artibus Innovation is the Skills Service Organisation supporting the IRCs of the property services industries in Australia. It develops, manages, and distributes nationally recognised Training Packages and associated training and assessment materials.

Refer www.artibus.com.au for more information.

About the property services sectors

The property services industries are comprised of diverse profitable sectors that play a key role in the Australian economy. Australia's property real estate sector alone is forecast to grow annually at a rate of 2.5% and reach \$49.9 billion in revenue by 2021–22.

The CPP Property Services Training Package provides the only nationally recognised vocational education and training (VET) qualifications for occupations involved in:

- access consulting
- building design
- cleaning
- facility management
- fire protection inspection and testing
- home energy efficiency and sustainability
- pest management
- property development
- property sales and management
- real estate
- security, public order and safety
- strata management
- surveying and spatial information services
- swimming pool and spa service.
- waste management.

Purpose of this Guide

This Guide supports the CPP Property Services Training Package. It has been developed to assist trainers, assessors, registered training organisations (RTOs) and others by providing information about the structure and contents of the training package, as well as other guidance material.

About training packages

A training package is an integrated set of nationally endorsed competency standards, assessment requirements and Australian Qualifications Framework (AQF) qualifications for a specific industry, industry sector or enterprise.

Each training package:

- provides a consistent and reliable set of components for training and for recognising and assessing learners' skills, and may also have optional support materials
- enables nationally recognised qualifications to be awarded through direct assessment of workplace competencies
- encourages the development and delivery of flexible training that suits learner and industry requirements
- strongly encourages learning and assessment in a work-related environment, which leads to verifiable workplace outcomes.

Training packages specify the skills and knowledge required to perform effectively in the workplace. They do not prescribe how an individual should be trained. Trainers and supervisors develop learning strategies - the 'how' - depending on learner needs, abilities and circumstances.

The ***Training Package Development and Endorsement Process Policy*** ensures that qualifications, units of competency and assessment requirements are developed to an agreed quality standard and are responsive to industry's existing and future demand for new skills.

The following key principles underpin the process:

- open and inclusive industry-driven improvement, validation and endorsement of training packages
- strong and clear key stakeholder roles with critical points of intervention and consultation
- high levels of responsiveness in order to meet industry needs and priorities for new skills.

Summary of the CPP Property Services Training Package

The CPP Property Services Training Package comprises:

- 33 qualifications
- 426 units of competency and associated assessment requirements
- 31 skill sets

Training package code and title

Each training package has a unique three letter national code that reflects the industry sector. For the CPP Property Services Training Package, the letter CPP stand for:

- CP = 'construction and property' industries
- P = 'property services' industries.
- Qualification codes

Qualification codes

As represented in the figure below, each qualification has a unique eight-character code the:

- first three characters identify the training package
- first number identifies the qualification level
- next two numbers identify the position of the qualification in the sequence of qualifications at that level
- last two numbers identify the year in which the qualification was endorsed.

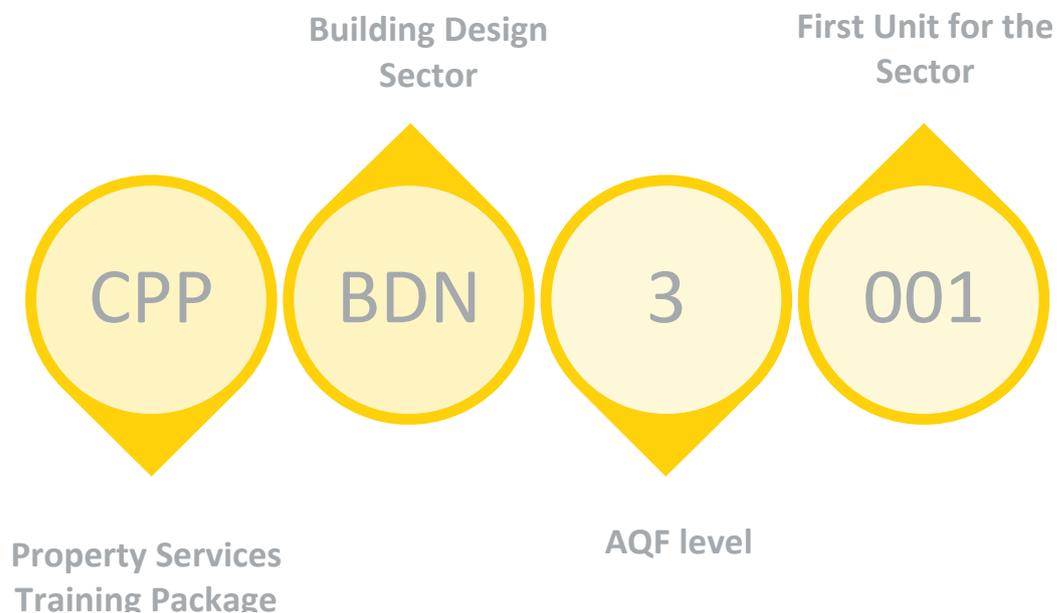

Unit of competency codes

Units of competency are nationally agreed statements about the skills and knowledge required for effective performance in the workplace. They identify outcomes as defined by regulatory requirements and agreed by industry. As such, they identify the skills and knowledge (as outcomes) that contribute to the whole job function - they do not describe how to perform a particular role.

As represented in the figure below, in the CPP Property Services Training Package, each unit of competency has a unique ten-character code where the:

- first three letters identify the training package
- next three letters identify the industry sector
- final four numbers identify the position of the unit in the sequence of units in the sector.

List of Training Package components

CPP Qualifications

Qualifications comprise units of competency that, packaged together, support an industry-agreed job role.

Qualifications typically comprise several mandatory core units that are required across the entire industry and a number of elective units that can be chosen to suit the industry sector and regulatory, enterprise, professional or individual requirements.

The AQF provides a comprehensive, nationally consistent framework for all qualifications in post-compulsory education and training in Australia.

In the VET sector, the AQF assists national consistency for all trainees, learners, employers and providers by enabling national recognition of qualifications and statements of attainment.

For a full explanation of the AQF, refer to the *AQF Second Edition* (January 2013), which may be found at www.aqf.edu.au.

CPPSEC3024	Install advanced technology security equipment and systems
CPPSEC3025	Diagnose faults in advanced technology security equipment and systems
CPPSEC3035	Recommend technical security requirements to meet client needs
CPPSEC3036	Program and configure security equipment and systems
CPPSEC3037	Test installed security equipment and systems
CPPSEC3038	Commission and decommission security equipment and systems
CPPSEC3039	Diagnose faults in electronic security equipment and systems
CPPSEC3040	Coordinate installation of security equipment and systems
CPPSEC3041	Conduct routine service of security equipment and systems
CPPSEC3042	Diagnose faults in video surveillance systems and equipment
CPPSEC3043	Establish and test electronic monitoring parameters for security equipment and systems
CPPSEC3044	Conduct routine service of electronic locks and locking systems
CPPSEC3045	Assess security equipment and systems to specify required modifications
CPPSEC3046	Develop security system configurations and specifications for client sites
CPPSEC3047	Provide estimate and quote on security system installations
CPPSEC3053	Implement measures to secure IP networked security equipment and systems
CPPSEC3101	Manage conflict and security risks using negotiation
CPPSEC3102	Maintain operational safety and security of work environment
CPPSEC3103	Determine and implement response to security risk situation
CPPSEC3104	Coordinate monitoring and control of individual and crowd behaviour
CPPSEC3105	Coordinate provision of quality security services to clients
CPPSEC3106	Gather, organise and present security information and documentation
CPPSEC3107	Monitor security and coordinate response from control rooms
CPPSEC3108	Store, protect and dispose of security information
CPPSEC3109	Use and maintain security databases and compile reports
CPPSEC3110	Control persons using batons
CPPSEC3111	Restrain persons using handcuffs
CPPSEC3112	Manage training and well-being of dogs for security functions
CPPSEC3113	Handle dogs for security patrols
CPPSEC3114	Control security risk situations using firearms
CPPSEC3115	Carry, operate and maintain revolvers for security purposes

Unit Code	Unit Title
CPPSEC3116	Carry, operate and maintain semi-automatic pistols for security purposes
CPPSEC3117	Carry, operate and maintain shotguns for security purposes
CPPSEC3118	Inspect and test cash-in-transit security equipment and rectify faults
CPPSEC3119	Implement cash-in-transit security procedures
CPPSEC3120	Load and unload cash-in-transit in secured and unsecured environments
CPPSEC3121	Control persons using empty hand techniques
CPPSEC3122	Plan provision of close protection services
CPPSEC3123	Implement close protection services
CPPSEC3124	Prepare and present evidence in court
CPPSEC3125	Implement security procedures to protect critical infrastructure and public assets
CPPSEC3126	Defend persons using spray
CPPSEC3127	Conduct security screening using x-ray equipment
CPPSEC3128	Conduct security screening using walk-through metal detection equipment
CPPSEC3129	Conduct security screening using explosive trace detection equipment
CPPSEC3130	Conduct security screening using hand-held metal detectors
CPPSEC3131	Select, use and maintain body armour for security purposes
CPPSEC4001	Manage work health and safety in the security work environment
CPPSEC4003	Assess and advise on client security needs
CPPSEC4004	Supervise security operations
CPPSEC4005	Facilitate security operations briefing and debriefing processes
CPPSEC4006	Conduct security risk assessment of client operations
CPPSEC4007	Identify security threats and assess impact on client operations
CPPSEC4008	Assess and prepare security tender submissions
CPPSEC4009	Interpret electronic information from advanced technology security systems
CPPSEC4010	Manage monitoring centre operations
CPPSEC4011	Manage field staff activity and incident response from control room
CPPSEC4012	Assess security vulnerabilities of assets
CPPSEC4014	Commission and decommission networked security systems
CPPSEC4015	Maintain networked security systems
CPPSEC4016	Install networked security systems
CPPSEC4017	Design security system configurations and specifications
CPPSEC4018	Program and configure networked security systems
CPPSEC4019	Diagnose faults in networked security systems

Unit Code	Unit Title
CPPSEC4020	Advise on advanced technology security systems to meet client needs
CPPSEC4021	Develop standard operating procedures for advanced technology security systems
CPPSEC4022	Establish and implement ethics and governance arrangements for security businesses
CPPSEC4023	Implement contracting arrangements for security businesses
CPPSEC4024	Assess security of crowded places
CPPSEC4025	Advise on operational requirements to maintain crowded place security

CPPSEC5003	Assess security risk management options
CPPSEC5004	Develop security risk management plans
CPPSEC5005	Implement security risk management plans
CPPSEC5006	Develop strategies to implement advanced technology security systems
CPPSEC5008	Analyse threat environment and devise strategies to respond to active threats
CPPSEC5009	Implement communication systems to respond to active threats
CPPSIS2012	Assist in collecting basic spatial data
CPPSIS2013	Store and retrieve basic spatial data
CPPSIS2015	Assist with surveying and spatial field activities
CPPSIS2016	Assist with load transfers
CPPSIS3011	Produce basic maps
CPPSIS3015	Collect basic surveying data
CPPSIS3016	Provide field support services for surveying and spatial projects
CPPSIS3018	Transfer loads
CPPSIS3019	Produce basic plans of surveys
CPPSIS3020	Perform basic surveying computations
CPPSIS3021	Visually interpret image data
CPPSIS4022	Store and retrieve spatial data
CPPSIS4024	Source and assess spatial data
CPPSIS4025	Collect spatial data using GNSS
CPPSIS4026	Digitally enhance and process image data
CPPSIS4027	Organise surveying field services
CPPSIS4030	Operate surveying equipment
CPPSIS4031	Perform surveying computations
CPPSIS4032	Conduct field surveying operations

Unit Code	Unit Title
CPPSIS4034	Maintain spatial data
CPPSIS4035	Apply GIS software to solve spatial data problems
CPPSIS4036	Operate spatial software applications
CPPSIS4037	Produce computer-aided drawings
CPPSIS4038	Prepare and present GIS data
CPPSIS4039	Design and produce maps
CPPSIS4040	Collect spatial data using terrestrial technologies
CPPSIS4041	Set out site and building works
CPPSIS5031	Plan spatial data collection
CPPSIS5032	Capture new spatial data
CPPSIS5035	Obtain and validate spatial data
CPPSIS5036	Integrate spatial datasets
CPPSIS5037	Maintain spatial data systems
CPPSIS5038	Develop spatial databases
CPPSIS5039	Plan and implement spatial projects
CPPSIS5040	Interpret and collate spatial data
CPPSIS5043	Design spatial data storage systems
CPPSIS5044	Develop subdivision survey designs for local government approval
CPPSIS5046	Set out stormwater systems
CPPSIS5047	Conduct GNSS surveys
CPPSIS5048	Conduct engineering surveys
CPPSIS5049	Plan and implement surveying projects
CPPSIS5051	Apply land and planning law to surveying
CPPSIS5052	Integrate surveying datasets
CPPSIS5053	Perform advanced surveying computations
CPPSIS5054	Perform geodetic surveying computations
CPPSIS5057	Conduct precision surveys
CPPSIS5058	Conduct geodetic surveys
CPPSIS5060	Develop spreadsheets for spatial data
CPPSIS5061	Locate underground services in surveying practice
CPPSIS5062	Conduct photogrammetric mapping
CPPSIS5064	Coordinate GIS data manipulation and analysis
CPPSIS5065	Design basic engineering structures

Unit Code	Unit Title
CPPSIS6021	Conduct open pit mine surveys
CPPSIS6022	Produce mine drawings
CPPSIS6025	Apply quality control measures to spatial products and services
CPPSIS6031	Design basic mines
CPPSIS6032	Conduct advanced GNSS control surveys
CPPSIS6033	Conduct underground mine surveys
CPPSIS6034	Conduct mining geology operations
CPPSIS6035	Conduct complex engineering set-out surveys
CPPSIS6036	Monitor engineering structures
CPPSIS6037	Conduct advanced remote sensing analysis
CPPSIS6040	Develop 2-D and 3-D terrain visualisations
CPPSIS6041	Compile mine survey plans
CPPSPS3001	Handle, transport and store swimming pool and spa chemicals safely
CPPSPS3002	Perform basic swimming pool and spa measurements and calculations
CPPSPS3003	Maintain swimming pools and spas
CPPSPS3004	Maintain swimming pool and spa water circulation and filtration systems
CPPSPS3005	Maintain swimming pool and spa dosing systems
CPPSPS3006	Maintain swimming pool and spa cleaning and vacuuming systems
CPPSPS3007	Maintain swimming pool and spa heating systems
CPPSPS3008	Work in the swimming pool and spa servicing industry
CPPSPS3009	Maintain swimming pool and spa stock
CPPSPS3010	Sell swimming pool and spa products and services
CPPSPS3011	Use and maintain business technology related to swimming pool and spa servicing
CPPSPS3012	Access and apply information from swimming pool and spa technical manuals
CPPSPS4001	Assess and treat water problems in swimming pools and spas
CPPSPS4002	Install and repair swimming pool and spa circulation and filtration systems
CPPSPS4003	Install and repair swimming pool and spa dosing systems
CPPSPS4004	Install and repair swimming pool and spa cleaning and vacuuming systems
CPPSPS4005	Install, service and repair swimming pool and spa heating systems
CPPSPS4006	Install, service and repair swimming pool and spa low voltage lighting systems
CPPSPS4007	Inspect, service and repair aquatic facility plant and equipment
CPPSPS4008	Install, service and repair spas
CPPSPS4009	Estimate cost of swimming pool and spa products and services

Unit Code	Unit Title
CPPSPS4012	Design, install and service automated systems for swimming pools and spas
CPPSPS4013	Establish maintenance plans for swimming pools and spas
CPPSPS4014	Drain and acid wash swimming pools and spas
CPPSPS4016	Advise on swimming pool and spa products and services
CPPSPS4017	Detect leaks in swimming pools and spas
CPPUPM3005	Manage pests without applying pesticides
CPPUPM3006	Manage pests by applying pesticides
CPPUPM3008	Inspect for and report on timber pests
CPPUPM3010	Control timber pests
CPPUPM3011	Manage organisms by applying fumigants to commodities and environments
CPPUPM3017	Maintain, service and repair pest management equipment
CPPUPM3018	Maintain equipment and pesticide storage area in pest management vehicles
CPPUPM3042	Install termite management systems
CPPUPM4001	Assess and select pest management vehicle and equipment
CPPUPM4002	Schedule, organise and monitor pest management operations
CPPUPM4003	Assess and advise on pest management options for sensitive operations
CPPUPM4004	Assess and advise on pest management options for complex operations
CPPUPM4005	Implement and monitor pest management plans for sensitive operations
CPPUPM4006	Implement and monitor pest management plans for complex operations
CPPWMT3001	Identify and segregate waste
CPPWMT3002	Conduct waste resource recovery
CPPWMT3003	Identify and respond to hazards and emergencies in waste management
CPPWMT3004	Comply with environmental protection requirements when transporting waste
CPPWMT3005	Maintain storage area for waste management equipment and consumables
CPPWMT3006	Receive, transfer and dispatch waste
CPPWMT3007	Process waste using plant
CPPWMT3008	Store and monitor contained waste
CPPWMT3009	Place, compact and cover waste at landfill sites
CPPWMT3010	Maintain waste landfill sites
CPPWMT3011	Conduct waste assessments
CPPWMT4001	Develop proposals for waste management services
CPPWMT4002	Develop waste management plans
CPPWMT4003	Implement waste management plans

Unit Code	Unit Title
CPPWMT4004	Prepare waste management tender submissions
CPPWMT4005	Implement waste management site safety plans
CPPWMT4006	Monitor waste landfill sites
CPPWMT4007	Organise and monitor waste management operations
CPPWMT4008	Provide waste management information to stakeholders
CPPWMT4009	Conduct waste audits
CPPWMT4010	Assess and advise on waste avoidance options

CPP Skill sets

Skill sets are single units of competency or combinations of units of competency from an endorsed training package that link to a licensing or regulatory requirement, or a defined industry need.

Skill sets may provide a bridge between qualifications and respond to regulatory needs or an identified emerging skill area.

Skill Set Code	Skill Set Title
CPPSS00045	Manage complex fumigation operations
CPPSS00046	Manage non-timber pests
CPPSS00047	Manage timber pests
CPPSS00048	Clean and restore hard floors
CPPSS00049	Clean carpets
CPPSS00050	Clean hospitals and aged care facilities
CPPSS00051	Clean residential work sites
CPPSS00052	Develop and implement environmentally sustainable cleaning programs
CPPSS00053	Implement environmentally sustainable cleaning programs
CPPSS00054	Induct cleaning staff
CPPSS00055	Perform environmentally sustainable cleaning operations
CPPSS00059	Batons and handcuffs
CPPSS00060	Canine
CPPSS00061	Cash-in-transit
CPPSS00062	Control room operations
CPPSS00063	Firearms
CPPSS00064	Monitoring centre operations

Note: the following table outlines the units of competency and qualification that were proposed for deletion from the National Register in Release 9.0 of the CPP Property Services Training Package.

These training package components were proposed for deletion due to:

- the significant overlap and duplication of intended outcomes between existing units of competency
- low enrolments figures.

Unit code	Unit title	Rationale
CPPHSA4006A	Manage own work, professional development and ethical behaviour as a home sustainability assessor	Significant overlap with CPPHSA4018A Manage own work, professional development and ethical behaviour, which has been updated to CPPCOM4001 Manage own work, professional development and ethical behaviour.
CPPHSA4008A	Apply sustainability principles, legislation and information on government programs	Incorporated into relevant updated units. Assess household energy use and efficiency improvements; Assess household water use and efficiency improvements; Assess household waste generation and options to improve waste management.
CPPHSA4010A	Estimate the cost of home sustainability measures	Significant overlap with CPPHSA4017A Cost measures to improve thermal performance of residential buildings, also recommended for deletion. The TAG advised that NatHERS and Home Sustainability Assessors don't do formal estimates but rather provide indicative costs. The concepts of indicative costs and cost effectiveness are reflected in the units.

Unit code	Unit title	Rationale
CPPHSA4011A	Collect information to support NatHERS assessment	Embedded in updated unit CPPHES4004 Conduct thermal performance assessment of residential buildings.
CPPHSA4013A	Conduct NatHERS assessment of existing residential buildings	Significant overlap with CPPHSA4012A Conduct NatHERS assessment of planned residential building. Updated unit refers to both existing and planned.
CPPHSA4014A	Meet regulatory requirements when completing NatHERS assessments	Embedded in relevant updated units CPPHES4004 Conduct thermal performance assessment of residential buildings, CPPHES5001 Conduct thermal performance assessment of complex residential buildings.
CPPHSA4016A	Advise on options for enhancing thermal performance of residential buildings	Embedded in relevant units.
CPPHSA4017A	Cost measures to improve thermal performance of residential buildings	Significant overlap with CPPHSA4010A Estimate the costs of home sustainability measures, also recommended for deletion. The TAG advised that NatHERS and Home Sustainability Assessors don't do costings but rather provide indicative costs. The concepts of indicative costs and cost effectiveness are reflected in the units.
CPPHSA5002A	Assess thermal performance and energy efficiency of residential buildings	0 enrolments for the four-year period 2014-2017.
CPPHSA5003A	Manage quality assurance of NatHERS assessments	0 enrolments for the four-year period 2014-2017. Auditing units, which address quality assurance have been imported into the qualification elective bank.

Unit code	Unit title	Rationale
CPPHSA5004A	Educate clients about thermal efficiency of residential buildings	0 enrolments for the four-year period 2014-2017.
CPPHSA5005A	Peer review NatHERS assessments	0 enrolments for the four-year period 2014-2017.
CPPHSA5006A	Promote low and zero carbon energy technologies in residential buildings	0 enrolments for the four-year period 2014-2017.
CPP51012	Diploma of Residential Building Energy Assessment	Data obtained from NCVER and the National Register of VET (training.gov.au) shows zero demand for the course. As no RTO has had it on scope, nor have there been any enrolments, the qualification will lapse.

Key work and training requirements in the industry

Simulated workplace environments

Simulated workplace environments aim to represent real workplaces in which training providers can train and assess the competency of candidates. This means that where units of competency state they can be assessed in a simulated workplace environment, realistic workplace conditions and standards, materials, activities, responsibilities, procedures, safety requirements and environmental considerations must be replicated whilst training and assessing the candidates.

Home energy efficiency and sustainability

Thermal performance assessors operate under the Nationwide House Energy Rating Scheme (NatHERS) to rate the energy efficiency of a home based on its design. They use government approved software and information obtained from residential building plans and drawings to model potential consumption of energy for heating and cooling purposes and assess and certify the thermal performance of homes based on a ten-star rating system.

Home sustainability assessors provide advice to homeowners seeking to improve the efficiency, cost to run, sustainability and comfort needs of their household. They conduct on-site assessments of residences and advise on opportunities to improve comfort and to save on energy and water costs, and ways to live more sustainably in a residential environment.

Licensing requirements apply to thermal performance assessments in some states and territories. For further information, check with the relevant regulatory authority.

Real estate

The rationale for the new CPP41419 Certificate in Real Estate Practice is based on the need to:

- streamline qualifications
- specify alignment between skill sets with areas of specialisation/job roles
- facilitate regulatory usage by outlining clear relationships to job activities
- provide a tool for direct alignment with licensing outcomes
- support issues around inconsistent licensing requirements by different jurisdictions
- ensure clear career pathways are provided.

The groups specified in the CPP41419 Certificate in Real Estate Practice are intended to align with licensing requirements.

The units packaged in the groups in the CPP41419 Certificate in Real Estate Practice are also packaged as skill sets. The table below maps the skill sets to the groups in the qualification.

Code	Title	Group in CPP41419 Certificate IV in Real Estate Practice
CPPSS00065	Residential Property Sales	Residential Property Sales
CPPSS00066	Residential Property Management	Residential Property Management
CPPSS00067	Property Management Business Development	Property Management Business Development
CPPSS00068	Auctioneering	Auctioneering

CPPSS00074	Stock and Station, Stock	Stock and Station, Stock
CPPSS00075	Stock and Station, Station	Stock and Station, Station
CPPSS00076	Administration Management/Office Support	Administration Management/Office Support

Note: CPPSS00076 Administration Management/Office Support is not associated with a licensing outcome.

It is the expectation of industry that graduates will specifically understand the range of 'customers' they interact with.

In the past the focus of the industry was on the 'client' i.e. the one who pays them. Usually the vendor or the landlord. There has been an evolution of thinking to more actively provide service to 'customers' such as tenants and buyers. Hence the specific separation in the PCs.

- Internal is within the business, or business network (client or customer is not critical here although there may be instances where this could be separated by direct report manager v's co-workers or other departments, particularly crossing sales and property management functions)
- Client is the one with the financial transaction/contract attached (vendor/landlord)
- Customer is a user of the service, predominantly buyers and tenants but could extend to the broader community (could have a financial transaction but not with the agent)

Security

Investigative Services

The CPP30619 Certificate III in Investigative Services provides occupational specialisations in factual investigation and surveillance, and a pathway to further learning and work in investigations management.

Investigators undertaking surveillance operations are required to operate a surveillance vehicle in compliance with road and traffic laws.

Legislative, regulatory or certification requirements apply to investigative services in some states and territories. For further information, check with the relevant regulatory authority.

Security Management and Risk

Legislative, regulatory or certification requirements apply in some states and territories to the provision of advice on security solutions, strategies, protocols and procedures. For further information, check with the relevant regulatory authority.

Certificate IV Security Management

This qualification provides occupational specialisations in security business management and supervision, and a pathway to further learning and work in security risk management.

Note: some of the units of competency within this qualification and have been clustered as skill sets. The skill sets listed below are associated with occupational specialisations:

- CPPSS00077 Security Supervision
- CPPSS00078 Security Business Management.

Technical Security

Licensing, legislative or certification requirements apply to advising on, supplying, installing, maintaining, monitoring, repairing and servicing security equipment in some states and territories. For further information, check with the relevant regulatory authority.

All cabling work, including telephone, data, fire and security alarm systems cabling, that connects with the telecommunications network must be performed by a registered cabler or under the direct supervision of a registered cabler as required by the Australian Communications Media Authority (ACMA) cabling provider rules. For further information on cabling registration requirements, check with ACMA.

The CPP20319 Certificate II in Technical Security qualification may result in open cabling registration for candidates who undertake:

- ICTCBL236 Install, maintain and modify customer premises communications cabling: ACMA Restricted Rule
- ICTCBL237 Install, maintain and modify customer premises communications cabling: ACMA Open Rule
- ICTWHS204 Follow work health and safety and environmental policies and procedures
- ICTTEN201 Use electrical skills in telecommunications work.

Structured cabling registration may also be achieved by undertaking the unit ICTCBL301 Install, terminate and certify structured cabling installation.

The following six units of competency are proposed units:

- CPPSEC3004A Lead small teams in the security industry
- CPPSEC3034A Operate information gathering equipment.
- CPPSEC3048A Maintain effective relationships with security clients
- CPPSEC3049A Modify and repair security equipment and system
- CPPSEC4002A Implement effective communication techniques
- CPPSEC5007A Assess biometrics system.

There will be a teach-out period of 12-months. Training providers will have to update their scope accordingly and must not enrol or train students after this 12-month period.

Equipment and systems cover a range of technologies from stand-alone alarm systems to fully integrated access control and internet protocol (IP) video security systems (VSS), and include:

- intruder alarms
- internal and external detection sensors
- access control
- biometric access control devices
- monitoring or surveillance systems such as closed-circuit television (CCTV)

- audio or visual recording systems
- electric, electro-magnetic locking systems.

Security operations

The security industry is highly regulated, with substantial involvement by jurisdictional regulators to ensure the best training and assessment outcomes for industry.

The security industry regulators anticipate that qualified individuals will have a basic level of English proficiency to clearly communicate with emergency services, team members and the general population whilst undertaking the role.

It is recommended that CPP Property Services Training Package users contact the relevant state or territory department/s to confirm regulatory and licensing requirements that may apply.

Note: Due to the nature of the occupations, assessment of performance for the units of competency must be undertaken in a simulated work environment for public safety reasons.

Cleaning operations

Cleaning operators work in a range of workplace settings. The cleaning sector employs large numbers of part-time and casual employees, with most work - especially in commercial premises - taking place out of business hours.

Cleaning operators use a range of different tools, equipment, chemicals, and non-chemical-based cleaning products to perform their duties.

Cleaning is skilled work, which, if not performed correctly, can result in costly damage to assets and potentially cause illness, largely through the misuse of chemicals.

Domestic or residential cleaning takes place in private homes where the work site may range from a large family home to a small apartment. This type of work is typically contracted out by small cleaning businesses or franchises employing cleaning operators, again on a part-time or casual basis. In these contexts, cleaning operators usually make use of the cleaning equipment and products provided on site by the client.

Cleaning companies tender for cleaning contracts that result in contracted work for cleaning staff over a fixed period of the contract. Cleaning operators may be required to work alone or as part of a team of cleaning operators at different work sites. The standard of cleaning expected by clients is high, and attention to detail is paramount. Work sites such as hospitals, aged care homes and catering facilities require meticulous attention to hygiene because the health implications of inadequate cleaning can be serious illness or death.

Evidence suggests that some employers are reluctant to invest in training cleaning operators due to the comparatively high staff turnover in some parts of the industry. In response to this, industry has been consulted to develop skill sets to provide entry-level training for new workers in specific areas to meet more immediate skill demands.

Urban pest management

Urban Pest management technicians require well-developed customer service skills as well as a sound knowledge of pests and integrated pest management. A pest management technician mostly works alone, operating from a vehicle carrying a range of pesticides to treat various pests as well as equipment and materials required for the particular types of jobs scheduled for each working day.

Whether working for a large company - with a work order supplied by the business - or as an owner operator, the pest management technician must be self-managing in terms of ensuring the timeliness, efficiency, effectiveness, safety, and quality of all aspects of the work at each site.

Surveying and spatial information services

The surveying and spatial information services industry relates to vocational training in the following fields:

- mapping science
- remote sensing
- surveying
- cartography
- town planning
- geographic information services.

The table below provides a summary of the main occupational profiles at each qualification level.

Qualification	Surveying	Spatial Information Services	
Certificate II	Entry (VET in Schools)	Entry (VET in Schools)	
Certificate III	Surveying Field Hand Data Collection Assistant	Surveying Field Hand Data Collection Assistant	
Certificate IV	Surveyor's Assistant	GIS Assistant Town Planning Assistant	Mapping Assistant
Diploma	Surveying Technician	Town Planning Officer GIS Officer	Cartographer Mapping Officer
Advanced Diploma	Manager or supervisor in: Remote Sensing, Surveying, Cartography, Town Planning, Mapping, Geographic Information Systems, etc.		
Degree	Senior Surveyor Specialist Surveyor (e.g. Geodetic)	GIS Analyst Cartographer Senior Cartographer Senior GIS Analyst	Senior Photogrammetrist Remote Sensing Specialist Spatial Controller

The surveying and spatial information services industry strongly supports the use of units of competency as a way to define training needs and drive delivery of vocational education and training for the industry.

Strata community management

A strata scheme is a system of multiple ownership of a building or collection of buildings. The concept only came into being in the mid-1960s, and there are now more than 270,000 such schemes encompassing more than two million individual lots across Australia.

Each owner owns a portion (called a 'lot'), which is usually an apartment or townhouse, but every owner shares ownership of any common property (e.g. foyers, driveways, and gardens) if it is indicated on the title. The multiple ownerships are combined in a legal entity called the Owners' Corporation - or body corporate, strata company or community association, depending on the State or Territory in which the scheme exists. Although the term for an owner's corporation varies across Australia, its role is essentially the same in every state and territory. It is responsible for the good management of the strata scheme.

All owners can vote on management decisions at an Annual General Meeting (AGM), but decisions are usually made on behalf of the owner's corporation by a committee of owners who are elected at the AGM. Some strata schemes manage the day-to-day financial, maintenance, and other administrative duties themselves, but given that they are complex, most choose to use professional strata management services.

Strata managers are engaged by the strata scheme's owner committee to manage the day-to-day affairs of the scheme. Strata schemes are becoming large and complex. Strata managers may perform the following tasks:

- arrange routine maintenance, repair and upkeep of the common property
- keep bank and other accounts for maintenance contributions (strata levies)
- pay accounts and outgoings
- maintain strata records
- organise and conduct strata meetings
- arrange insurance.

The role of strata managers varies depending on the size and type of property, and involves people management, as well as someone who is organised and able to handle difficult clients from time-to-time.

Occasionally strata managers are appointed to solve intractable problems, including those involving relationship breakdowns between lot owners. Strata managers are experts in the administration of all aspects of owners' corporations. They work to ensure owners corporations are compliant with their legal responsibilities and strive to protect owners' assets.

Strata managing agents may also offer management services to residential and commercial properties, retirement villages, hotels and resorts, industrial schemes and shopping centres.

Other terms used to describe a strata manager are body corporate manager, owner, corporation manager, community title manager, and managing agent.

Swimming pool and spa service

Swimming pool and spa service activities include routine pool and spa servicing, monitoring and maintaining water quality and general work skills in domestic, commercial and public settings.

Summary of activities includes:

- identify risk and apply risk management processes
- follow site work health and safety requirements
- read and apply information from swimming pool and spa technical manuals
- assess and treat water problems in swimming pools and spas
- estimate cost of swimming pool and spa products and services
- comply with regulatory requirements for swimming pool and spa servicing
- monitor pool water quality
- maintain pool water quality
- apply work health and safety requirements, policies and procedures in the construction industry
- inspect, service and repair aquatic facility plant and equipment
- establish maintenance plans for swimming pools and spas
- drain and acid wash swimming pools and spas
- detect leaks in swimming pools and spas.

Regulation and licensing requirements - implications for implementation

Home energy efficiency and sustainability

There are no licensing requirements applicable to become a NatHERS assessor. Note, to become an accredited NatHERS Assessor, you must maintain your accreditation with one of the following Assessor Accrediting Organisations (AAOs) operating nationally:

- Australian Building Sustainability Association (ABSA)
- Building Designers Association Victoria (BDAV)

Regulators are recommended to update their licensing frameworks to align licensing requirements with these real estate skill sets.

Implementation timelines may vary as states and territories will need to review and update regulatory requirements.

Existing license holders should not be impacted by these changes.

Security

Six skill sets have been developed to align with licence endorsements in jurisdictions that license these activities:

Code	Title
CPPSS00059	Baton and Handcuffs Endorsement
CPPSS00060	Canine Endorsement
CPPSS00061	Cash-in-Transit Endorsement
CPPSS00062	Control Room Operations Endorsements
CPPSS00063	Firearms Endorsement
CPPSS00064	Monitoring Centre Operations Endorsements

Regulators should consider updating their licensing frameworks to align licensing requirements with these security skill sets.

Implementation timelines may vary as states and territories will need to review and update regulatory requirements. Existing license holders should not be impacted by these changes.

Cleaning operations

Cleaning operations is not a licensed occupation.

Urban pest management

Urban pest management is a licensed occupation, where the minimum requirement for operating as an independent pest manager in all jurisdictions except Western Australia (WA) is the attainment of the skill set CPPSS00046 Manage non-timber pests.

There are two other skill sets used for licensing and these are:

- CPPSS00045 Manage complex fumigation operations
- CPPSS00047 Manage timber pests.

Many people employed in the pest management industry will attain one or more of these skill sets, depending on the core business of the company employing them, or if entering into the sector themselves, on which services they wish to offer as an owner-operator.

The use of these skill sets for licensing sub-sectors of the industry goes some way to explaining the relatively low enrolment and completion figures for the Certificate III in Pest Management compared to the number of companies and technicians operating in the pest management sector.

Western Australia allows for a person who has achieved competence in the unit *CPPPMT3006 Manage pests by applying pesticides* to obtain a provisional licence. This provisional licence is valid for 12 months - to continue to practise as a pest management technician, provisional licence holders in WA must achieve the Certificate III in Urban Pest Management (13 units of competency) over twelve months.

It is recommended that CPP Property Services Training Package users contact the relevant state or territory department/s to confirm regulatory and licensing requirements that may apply.

Surveying and spatial information services

There is currently no common licensing regime in Australia for the use of spatial data. Government agencies, individual organisations and businesses have their own separate agreements and licensing arrangements in place.

Cadastral and mining surveying are licensed activities with regulatory requirements differing across the states and territories. It is recommended that CPP Property Services Training Package users contact the relevant state or territory regulatory authorities to confirm regulatory and licensing requirements that may apply.

The table below provides details about Standards that may be of interest to those within the private pools and spas industry, including:

- Australian Standards and safety

- workplace occupational health and safety
- water and energy conservation
- national training and licensing standards.

*This is not an exhaustive list and users should also check with their local regulator and licensing authority.

Building Contracts
<p>Australian building contracts are covered by:</p> <ul style="list-style-type: none"> • AS 2124, 2125, 2127 General conditions of contract - Annexures series • AS 4000 General conditions of contract series • AS 4300 General conditions of contract for design and construct series • AS 4902 General conditions of contract for design and construct series
Manufacturing and Installation
<p>Manufacturers and installers of spa baths should conform to the requirements outlined in AS 3861-1991 (R2016) Spa baths and AS 2610.2-2007 (R2016) Spa pools - Private spas.</p>
Electrical Equipment
<p>Electrical equipment used with spas should be installed by following the details that are included in AS/NZS 3000:2018, Electrical installations (known as the Australian/New Zealand Wiring Rules). A table providing information on zoning and ingress protection levels for electrical equipment used with pools and spas is also included in this Standard.</p>
Filtration Equipment
<p>Filtration equipment, outlet devices and skimmer boxes used with pools and spas should be designed and installed by following the information in AS 2610.2-2007 Spa pools – Private spas and AS 1926.3-2010 Swimming pool safety – Water recirculation systems.</p> <p>Diagrams illustrating recommended dimensions for skimmer boxes are also included in AS 1926.3-2010 Swimming pool safety – Water recirculation systems.</p> <p>These Standards cover product safety requirements for fittings that are supplied with pools and spas.</p> <p>Information about details for filtration systems, outlet devices and pumps used with large public pools and spas is included in HB 241-2002 Water Management for Public Swimming Pools and Spas.</p>
Plumbing Fittings
<p>Plumbing products and fittings with swimming pools and spas should be installed by following the information that is included in AS/NZS 3500.1:2003 Plumbing and drainage – Water services and AS/NZS 3500.4:2003 Plumbing and drainage – Heated water services. These Standards are also available as AS/NZS 3500 (Set):2003 Plumbing and drainage Set.</p>
Fences for Pools and Spas
<p>Barriers designed to prevent young children entering pools and spas should be manufactured following the information that is included in AS 1926.1-2007 Swimming pool safety - Safety barriers for swimming pools. This Standard specifies requirements for the design, construction and performance of fences, gates, retaining walls, windows, door sets, and balconies intended to form a barrier that will restrict the access of young children to swimming pools.</p>

Information about the options for the location of safety barriers intended to restrict access to swimming pools is included in AS 1926.2-2007 Swimming pool safety – Location of safety barriers for swimming pools. This Standard may be regulated in different ways by state and territory building regulators.

Pool Safety

Ladders and diving boards used with pools and spas should be designed to meet the requirements described in AS 2818-1993 Guide to swimming pool safety. General information about safety and maintenance requirements for pools and spas is also included in this Standard.

Flotation aids used to assist persons with swimming should be tested to the requirements covered in AS 1900-2002 Flotation aids for water familiarization and swimming tuition.

Water safety signs placed near pools and spas should follow the recommendations in:

AS/NZS 2416.1:2010 Water safety signs and beach safety flags – Specifications for water safety signs used in workplaces and public areas (ISO 20712-1:2008, MOD)

AS/NZS 2416.3:2010 Water safety signs and beach safety flags – Guidance for use.

Water Quality Levels

Information about recommended chlorination levels for private pools and spas are included in AS 3633-1989 Private swimming pools – Water quality. A table listing properties for different types of water sanitising products is also included in this Standard.

Information about recommended water quality requirements for public pools and spas is included in HB 241-2002 Water Management for Public Pools and Spas. Detailed information about types of equipment that may be used to determine water quality is also included in this Handbook.

Water quality levels can also be assessed by following the types of tests included in the AS/NZS 4276 Water microbiology Series.

Storing Chemicals

Large quantities of corrosive substances may be stored by owners and operators of pools and spas. These types of dangerous goods should be stored by following the information that is included in AS 3780 – 2008 The storage and handling of corrosive substances.

There may also be circumstances where different classes of chemicals (dangerous goods) are stored in the one location. In these cases, the storage requirements described in AS/NZS 3833:2007 The storage and handling of mixed classes of dangerous goods in packages and intermediate bulk containers can be followed.

Disability Access

Administrators, designers and owners of public pools and spas should ensure persons with disabilities have equal and unimpeded access to facilities. This can be achieved by following the information that is included in AS 1428.1-2009 Design for access and mobility – General requirements for access – New building work.

This Standard includes diagrams illustrating required circulation spaces and building access (including the use of ramps, handrails and stairs) for people with disability.

Tactile ground surface indicators used to assist people with visual impairment should be designed and located by following the information in AS 1428.4.1-2009 Design for access and mobility - Means to assist the orientation of people with vision impairment - Tactile ground surface indicators.

Implementation information

Information on the key features of the Training Package and the industry that will impact on the selection of training pathways

To meet the demands of industry and the requirements of VET stakeholders, training packages and the qualifications and units they contain are subject to change.

Training Packages are version controlled and users are advised to check training.gov.au for the latest version of CPP Property Services Training Package.

From 2015 onwards, further versions of this Training Package will be released as more qualifications, skill sets, and units of competency are transitioned into CPP from CPP07.

Training and assessment pathways

Pathways generally define a path or sequence of learning or experiences that can be followed to attain competency. They are not mandatory and may vary depending on the qualification or training program and the needs of the learner. They should be based on the learner's education and experience and the needs of the workplace as required.

Assessment by any pathway must comply with the assessment requirements associated with the unit of competency and the Standards for Registered Training Organisations (RTOs) current at the time of assessment.

Maintaining currency in the Property Services Training Package

To effectively deliver and assess against Property Services Training Package units of competency, trainers and assessors will need to maintain currency of knowledge, skills and industry experience.

It is strongly recommended that to maintain their vocational currency, trainers and assessors should have undertaken work experience or professional development related to the industry sector for the respective qualification within the past two years.

Assessment conditions

The assessment requirements document that relates to each CPP Property Services Training Package unit of competency contains an *Assessment Conditions* section that lists a range of requirements for assessment, typically under the following categories:

- equipment
- materials
- specifications
- relationships with team member and supervisor
- relationship with clients.

Where training and assessment are conducted in a real work site, safety and workplace induction requirements for RTO staff and learners may apply. In these situations, RTOs must ensure that any requirements to access and operate on the worksite are met. This may include the safe handling and operation of plant, equipment and materials. When training and assessment are conducted in a close simulation to the workplace, RTOs are also required to follow safety requirements related to the simulated worksite.

Entry requirements

Entry requirements are the skills, knowledge and experience required to enter a qualification. These requirements may be expressed in terms of competency from a lower level qualification or vocational expertise – including job roles – or both. When entry requirements apply, they must be achieved prior to entering the qualification or being issued the qualification.

Entry requirements in the CPP qualifications aim to support learner pathways and strengthen vocational outcomes and align with the AQF Pathways Policy.

Urban pest management

The CPP30119 Certificate III in Urban Pest Management qualification describes the skills needed by all urban pest managers and includes units required for licensing around the country. This qualification primarily deals with standard domestic and commercial environment.

The CPP41619 Certificate IV in Urban Pest Management is intended to build in this foundation for more complex work in high-risk and sensitive sites such as hospitals, aged care centres and food manufacturing/storage facilities. More complex and high-risk site work builds on this to include contribution to HACCP planning and management, food safety and health environmental considerations. This work has a higher level of responsibility and accountability and therefore requires a higher-level qualification.

Industry feels that entrants to the Certificate IV should have the minimum entry required to undertake the base function of a pest manager (i.e. the Certificate III, prior to entering the higher risk fields of work).

Pathways advice

The AQF provides a comprehensive, nationally consistent framework for qualifications in post-compulsory education and training in Australia. The framework helps to provide consistency in the VET sector for all trainees, learners, employers and providers by enabling recognition of qualifications and Statements of Attainment.

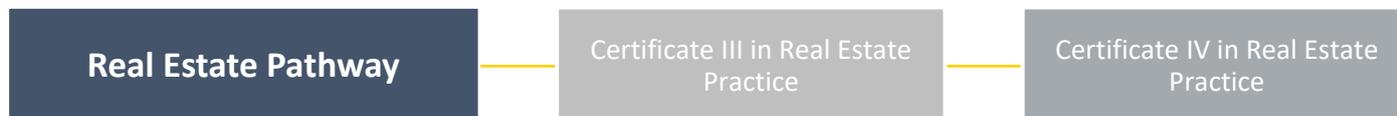

The framework enables learners to have flexible pathways that can be horizontal (across AQF qualifications at the same level in different industry sectors) and vertical (from qualifications at different levels within the one sector) and eliminates unnecessary and unfair barriers to AQF qualifications.

Home energy efficiency and sustainability

CPP41119 Certificate IV in Home Energy Efficiency and Sustainability is a stand-alone qualification in a niche industry, however, an occupational relationship exists between this qualification, and the building design and access consulting qualifications.

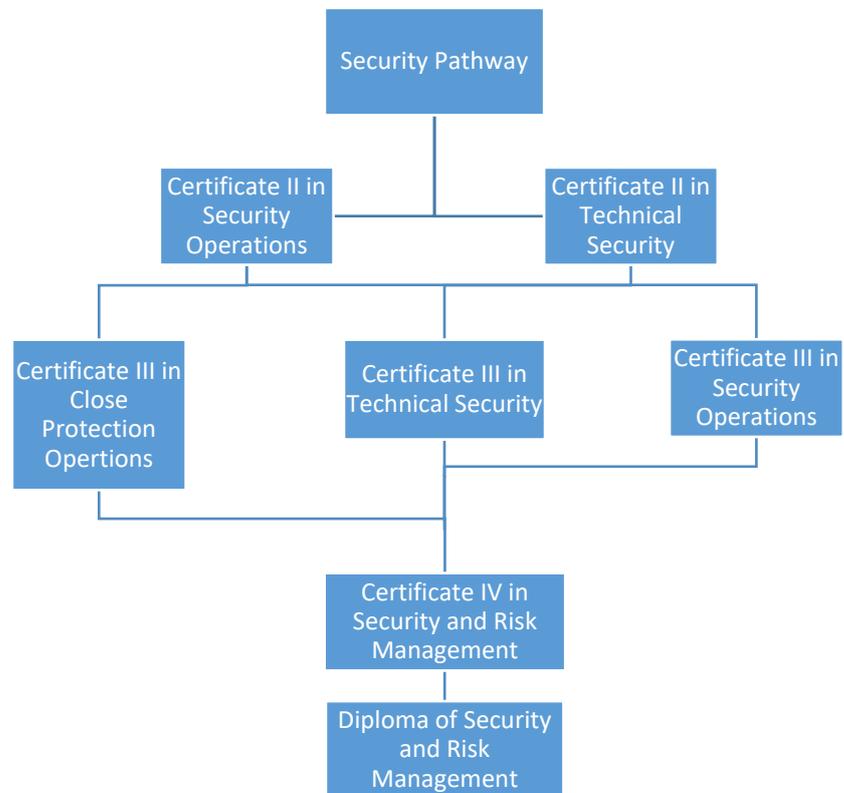

Real estate

The chart below provides an outline of the pathways into and from the CPP Property Services Training Package real estate qualifications.

Security

The chart below provides an outline of the pathways into and from the CPP Property Services Training Package security qualifications.

Cleaning operations

The chart below provides an outline of the pathways into and from the CPP Property Services Training Package cleaning qualifications.

Urban pest management

Attainment of a pest management skill set is a pathway into the industry:

- CPPSS00045 Manage complex fumigation operations
- CPPSS00046 Manage non-timber pests
- CPPSS00047 Manage timber pests.

The units achieved in these skill sets are also relevant for the entry level qualification, CPP30119 Certificate III in Urban Pest Management. Pathways from this qualification are horizontal and cross into other property services industries. The CPP30119 Certificate III in Urban Pest Management also functions as direct entry requirement into the new CPP41619 Certificate IV in Urban Pest Management.

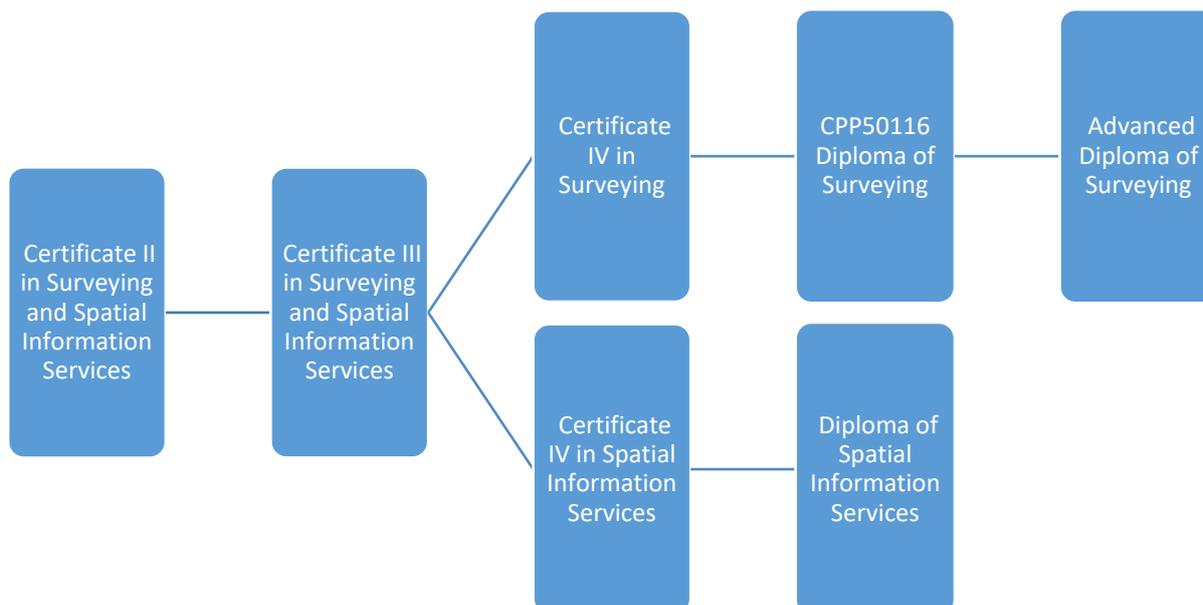

Surveying and spatial information services

The qualifications' structure for surveying and spatial information services provides formal training pathways from the pre-vocational level at Certificate II, through to the Diploma level for spatial information services, and the Advanced Diploma level for surveying.

CPP20116 Certificate II in Surveying and Spatial Information Services is an induction qualification for the industry and provides entrants with an introduction into work undertaken in both sectors.

In Western Australia, attainment of both CPP50116 and CPP60116 can achieve eligibility for authorisation as a mines' surveyor.

The chart below provides an outline of the pathways into and from the CPP Property Services Training Package surveying and spatial information qualifications.

Strata community management

CPP30416 Certificate III in Strata Community Management is an entry-level qualification into the strata community management industry. Graduates of CPP30416 could progress to CPP40516 Certificate IV in Strata Community Management, which applies to individuals involved in providing management services for strata communities. To promote pathways into CPP40516, the packaging rules of CPP30416 contain a number of units that are also in the packaging rules of CPP40516.

To progress to senior strata management roles in larger enterprises or establish their own strata community management agencies, it is envisaged that graduates of CPP40516 would undertake CPP50316 Diploma of Strata Community Management.

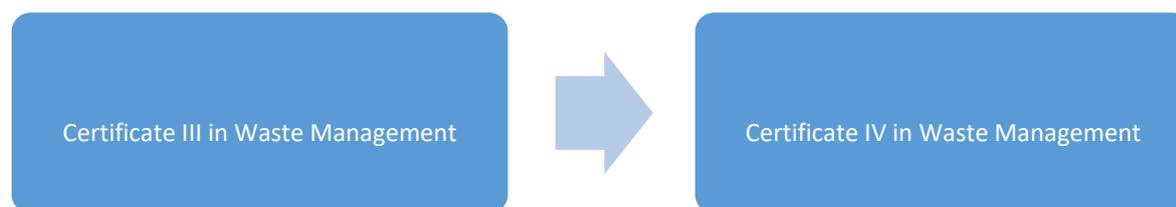

The chart below provides an outline of the pathways into and from the CPP Property Services Training Package strata management qualifications.

Swimming pool and spa service

CPP31218 Certificate III in Swimming Pool and Spa Service is the entry level qualification for the industry; pathways from this qualification are horizontal and cross into other property services industries.

Credit arrangements with higher education qualifications for the CPP

At the time of endorsement of the CPP Property Services Training Package no national credit arrangements exist between qualifications in this training package and higher education qualifications.

Access and equity considerations

An individual's access to the learning and assessment processes should not be adversely affected by restrictions placed on the location or context of this learning and assessment beyond the requirements specified in the CPP Property Services Training Package and must be bias-free.

Training Packages must reflect and cater for the increasing diversity of Australia's VET clients and Australia's current and future workforce. The flexibility offered by Training Packages should enhance opportunities and potential outcomes for all learners so that all benefit from a wider national skills base and a shared contribution to Australia's economic development and social and cultural life.

Reasonable adjustment

It is important that education providers take meaningful, transparent and reasonable steps to consult on, consider and implement reasonable adjustments for learners with specific learning needs.

Under the *Disability Standards for Education 2005*, education providers must make reasonable adjustments for people with a disability to the maximum extent that those adjustments do not cause that provider unjustifiable hardship. While 'reasonable adjustment' and 'unjustifiable hardship' are different concepts and involve different considerations, they both seek to create a balance between the interests of education providers and the interests of all potential learners.

An adjustment is any measure or action that a learner requires because of their disability and which has the effect of assisting the learner to access and participate in education and training on the same basis as those without a disability. An adjustment is reasonable if it achieves this purpose while considering factors such as the nature of the learner's disability, the views of the learner, the potential effect of the adjustment on the learner and others who might be affected, and the costs and benefits of making the adjustment.

An education provider is also entitled to maintain the academic integrity of a course or program and to consider the requirements or components that are inherent or essential to its nature when assessing whether an adjustment is reasonable.

The *Disability Standards for Education 2005* and the *Disability Standards for Education Guidance Notes* can be downloaded at www.education.gov.au/disability-standards-education-2005.

Foundation skills

Foundation skills are the non-technical skills that support an individual's participation in the workplace, in the community and in education and training.

In this Training Package the foundation skills incorporate the language, literacy and numeracy (LLN) skills described in the Australian Core Skills Framework (ACSF).

The framework includes:

- Learning
- Reading
- Writing
- Oral Communications
- Numeracy.

Where foundations skills essential to performance in a unit **are explicit**, the following statement will be included under the foundation skills field:

'Foundation skills essential to performance are explicit in the performance criteria of this unit of competency'.

Where foundation skills essential to performance in a unit are **not explicit**, then they will be listed in the foundation skills field in that unit.

Advice on any health and safety implications in the industry

Where required, work health and safety elements have been addressed in CPP Property Services Training Package qualifications, units of competency and their assessment requirements.

For further information about work health and safety, contact Safe Work Australia (www.safeworkaustralia.gov.au) and/or the relevant state or territory work health and safety regulator.

Resources and equipment relevant to this Training Package

The assessment conditions section of the assessment requirements for each unit of competency specifies resources and equipment required for assessment.

Legal consideration for the learners in the workplace including placements

Legal requirements for learners in the workplace or involved in work experience that apply to industry-specific sectors covered in the CPP Property Services Training Package vary across each state and territory and can change from time to time.

Users should contact the relevant state or territory training authorities provided at the end of this Guide to check if legal requirements apply.

Work placements should always involve appropriate supervision and guidance from individuals in the workplace as well as from RTO trainers and assessors and must adhere to required legislation that applies in the jurisdiction.

Apprenticeships and traineeships are formal training arrangements between an employer and an employee that have been established by a state or territory training authority. Where a qualification is used for an apprenticeship or traineeship, the training must be recognised by the state or territory training authority. This includes the form and registration of indenture.

Further information relevant to implementing the Training Package

Where imported units of competency are used as part of CPP Property Services Training Package qualifications, RTOs must consider and meet the specific training and assessment requirements of those imported units and their parent Training Package.

These requirements may include specific legal, work health and safety, resourcing and equipment requirements, as well as unique trainer and assessor requirements, including industry experience.

Candidates receive a statement of attainment acknowledgement for units of competency attained.
